

ECCMA 10th Annual International Conference

**October 27-29, 2009
Bethlehem, Pennsylvania USA**

CALL FOR PRESENTATIONS

Audience Expertise: This conference program is designed for data managers and information officers with a high-level of technical knowledge and experience.

Wednesday October 28th

ISO 8000 - Best Practice in managing data quality: the panel will provide practical insights into the development and management of quality data in support of corporate mergers and acquisitions, part standardization, inventory management and spend analysis. The panel will address the need to define data requirements and the process of acquiring and validating data in their industry.

This is a panel presentation where speakers are asked to address industry specific challenges. Industries that are of particular interest are defense, mining, oil and gas, utilities, manufacturing and plant management, building and construction. Any other industries please do not hesitate to submit a proposed presentation.
