

ISO 8000-110:2008

Master Data Quality Manager (MDQM™) Certification ECCMA Technical Short Course

Pre Conference Workshop Tuesday October 27, 2009 Bethlehem Pa

Who Should Attend?

- Data Quality managers responsible for the quality of SAP, Oracle or other ERP vendor, item or service masters to include the development of short and long descriptions
- Maintenance planners and plant managers as well as their commodity managers
- Purchasing personnel responsible for sourcing and contracts
- Content managers responsible for developing buy or sell side catalogs
- Designers managing parts standardization programs
- IT managers responsible for data integration and data portability
- IT managers responsible for data warehousing and long term data preservation

Course Outline

10:00-12:00- Theory

- NATO codification system as the foundation for the eOTD, ISO 22745 and ISO 8000
- Creating a metadata registry
- Developing data requirement statements
- Measuring data quality
- Researching and requesting missing data
- Developing rules for descriptions

13:00-15:00- Practice

Attendees will use the internet to access the ECCMA certification web site to:

- Develop an eOTD-i-xml Identification Guide
- Create an eOTD-q-xml request for characteristic or reference data
- Create an eOTD-r-xml reply to a request for data

DON'T MISS! Attendees will be given their ISO 8000-110:2008 certification as a Master Data Quality Manager (organization and individual) and will only pay for their certification instead of the regular course price!

Your Course Presenter

Mr. Peter Benson is the Executive Director and Chief Technical Officer of the Electronic Commerce Code Management Association (ECCMA). From 1994 to 1998, Peter served as the elected chairman of the American National Standards Institute Accredited Committee ANSI ASCX 12E, the Standards Committee responsible for the development and maintenance of EDI standard for product data. Peter is known for the design, development and global promotion of the UNSPSC as an internationally recognized commodity classification and more recently for the design of the eOTD, an internationally recognized open technical dictionary based on the NATO codification system. Peter is the Project Leader for ISO 22745 and ISO 8000 as well as the ISO TC 184/SC 4 Quality committee convener. He is an expert in metadata, master data and their use in creating quality portable content.
